

# Highland Spring Group

## Rail Freight Development Plans

Highland Spring was founded in Blackford almost 40 years ago. During that time it has become the UK's leading producer and supplier of natural sourced bottled water. We have always respected the community of Blackford and shared our plans with them at the appropriate time.

In order to update you on our plans and Network Rail's linked proposals, we are holding a "drop in session" and would like to invite you along to give you the opportunity to ask questions on:

**Wednesday 20<sup>th</sup> June 2018**  
**between 2.00<sup>pm</sup> & 8.00<sup>pm</sup>**

**Highland Spring Ltd, Stirling Street,  
Blackford, Perthshire PH4 1QA**

There is no formal presentation planned so feel free to drop in at any time from 2<sup>pm</sup> onwards where members of staff will be available to show you our plans and answer your questions.

The plans relate to amendments required to the approved scheme to enable operational improvements which we believe will also benefit the local community.

Network Rail will also be in attendance on the day to discuss their plans for a new footbridge crossing over the railway. We are working closely with Network Rail to co-ordinate our projects and we look forward to welcoming you on the 20th June to discuss the proposals.
